Senior Project Forester & SP Foresters

Renewable Forest Services Ltd. is a forest consulting company with offices in Campbell River and Port McNeill, British Columbia. We provide our clients with seasoned, competent personnel who focus on achieving a high-level of quality production in the safest manner possible. Renewable maintains a safe, productive and professional environment, compensating our staff with the industry's top wages and flexible work schedules. Most importantly, we want individuals who value independence and desire challenging work where their professional opinion is respected.

Renewable Forest Services Ltd. is currently seeking:

A permanent full-time Senior Project Forester. In this dynamic and critical role, you will provide the expertise and professional independence necessary to meet the needs of our clients. You understand how to incorporate higher-level planning into operational planning documents and provide guidance to inform project strategies. You can design and administer tenure obligation programs.

Permanent full-time Site Plan Foresters. You will support our project teams conducting SP data collection and administration. You can assist with road and cutblock layout activities when required. You will assist the Senior Project Forester with the administration of all forestry planning and silviculture tasks associated with our projects.

Qualifications:

- Registration in good standing as an RPF (Senior Project Forester requirement) or enrollment as an FIT with the Association of BC Forest Professionals
- A commitment to safe work practices and to the safety of co-workers
- Experience managing integrated resource strategies and objectives, and higher-level planning initiatives (Senior Project Forester)
- Experience implementing ecosystem-based management and other forest legislation
- Demonstrated ability to organize and execute workloads across multiple client projects as part of a diligent and accountable team
- Possess excellent inter-personal and technical communication skills required for a professional environment and essential for leading project teams
- Current knowledge of forestry-related software (CENFOR, CENGEA, ArcGIS, TFM etc.), MS Office applications and GPS equipment
- Knowledge of coastal conventional and helicopter-based harvesting systems is a desired asset
- Knowledge of road / cutting permit compilation and the appraisal process is a desired asset
- Available to travel
- Valid driver's license

Renewable is looking for people who are committed to understanding and growing our business together. Our success is based on team work and respect, delivering projects to the client on time, on scope and on budget.

Less qualified potential applicants with an RPF designation and interested in growing a career as a registered professional forester are encouraged to apply.

Please submit your cover letter and resume in confidence to:
