

Maintenance Superintendent

Edgewood Forest Products Inc. based in Carrot River, SK is a forest products company that produces stud lumber for the North American housing and construction markets. We currently seek an effective Maintenance Superintendent to join our manufacturing team. The incumbent will lead a department of technical and skilled trades staff in effective preventive and corrective maintenance, as well as implementation of continuous improvement initiatives.

The applicant must possess the following skills: be a team player, have excellent communications skills, show leadership qualities, be comfortable giving direction to senior tradesmen, be extremely well organized, and must have excellent computer skills with an aptitude for planning ahead.

The ideal candidate will be a journeyman millwright, industrial electrician, or mechanical engineer with a minimum of 5-years leadership experience in softwood lumber manufacturing. A technical understanding of automated plant controls is required.

This position will be a key player on the production and maintenance teams. Edgewood offers a competitive salary and benefits package. If you think this is you, reply in confidence with your resume via email to treid@edgewoodfp.com before September 1st, 2017.
