

## North Bay, Ontario *(with location flexibility for you)* Planning Forester

### Our Opportunity:

Join our entrepreneurial team as a Planning Forester tasked with developing the Long Term Management Direction on three Forest Management Units in southern Ontario. Working with tenure holders and our forest estate modeler, you will create a base model inventory, develop forest management objectives, specify model inputs, develop the LTMD and develop FMP tables while ensuring that all project deadlines are met.

### Qualifications:

- Degree in forestry with RPF status
- Project management experience that has led to cost-effective outcomes
- Demonstrated experience in one or more of the following forestry related fields:
  - Forest estate modeling
  - Forest management planning
  - Forest operations
  - Silviculture
  - Any of the above in the Great Lakes St. Lawrence Forest
- People call you a team player. They complement you on your analytical skills. You work well under pressure.
- Your communication skills are refined enabling you to connect well with clients, the Government, the public and others.

First Resource Management Group Inc. (FRMG) is a privately held company providing forest management services for tenure holders on over 7 million hectares of Crown forest in Ontario. We develop the FMPs, navigate the complex approval process, plan and implement silviculture programs and achieve operational compliance. We are active in the forest carbon market. Our SkyForest™ remote sensing technology provides inventory insights across Canada. We are foresters, through and through, with a mission to advance the practice of forestry. And, we are a great place to build a career. Our teleworking environment could provide you with the flexibility to accommodate your desired work location.
