

Senior Forest Technicians

GreenStar Forest Solutions Inc., a consulting firm based in Valemount, BC, is looking for forestry professionals with experience in cutting permit development on mountainous terrain.

Valemount is a community on the verge of transformation. The imminent development of the Glacier Destinations Resort, our local geothermal resources, mountain bike parks and unparalleled winter recreation terrain contribute to a vibrant small-town atmosphere.

You'll spend most of your time in the field, assessing logging chance, laying out road and boundary, and collecting hydrological and ecological data. Successful candidates will have highly developed interpersonal and technical skills, and the ability to work efficiently while contributing to a safety-oriented work environment. Skill with Office applications will be an asset, as will familiarity with GPS, LIDAR, and other GIS applications.

You must be physically fit and able to adapt to a variety of conditions, clients, and project configurations.

Opportunities exist for candidates with a strong interest in expanding their skill set into the areas of visual impact assessments, GIS, and remote sensing.

These are permanent, full-time positions. Lesser-qualified individuals may be considered. GreenStar offers competitive remuneration and training allowances.

We specialize in Cutting Permit development, timber assessments, and silviculture services for clients in the Robson Valley and elsewhere in the interior of the province.

While we thank you for your interest, only short-listed candidates will receive responses.

Submit resumes and cover letters to: john@GreenStarfsi.com before April 30, 2017.
