Maple Leaf Forestry Ltd. is seeking a **Project Manager/Field Supervisor** to join our professional team. The position is based out of **Cranbrook, full-time** with a mix of **field and office** activities, and **available immediately!**

Job description

- Project management for multi-phase forestry projects including operational planning, road and cut-block design, and forestry engineering
- Supervision and quality control of various field activities including cut-block layout, road layout, riparian/stream assessments, stand level assessments, road traverse surveys, forest health surveys, etc.
- Preparation of block site plans and harvest plans
- Preparation of road designs for new construction and road upgrade projects
- Quality management & supervision for timber harvesting operations
- Quality management & supervision for road construction projects

Preferred qualifications & skill sets

- RFT or RPF in good standing with the ABCFP. *Those that are enrolled or eligible for enrolment with the ABCFP will also be considered.*
- 3+ years supervisory experience in the natural resource sector
- Experience in resource development and capital projects
- Experience in road construction and logging operations
- Demonstrated project management experience – field and office
- Understanding of geometric road designs, bridge site plans, and engineered structures for resource roads
- Experience with LiDAR
- Strong problem solver and analytical thinker
- Proposal development skills
