

Implementer of a Lumber Industry Inventory System

MillTech Inventory Management Solutions, a leading supplier of lumber inventory software, is in growth mode and is looking for a lumber inventory/sales system implementer.

Candidates must either have implemented or has been a power user of a wood products industry inventory system at a lumber producing company.

The implementer's responsibilities include evaluating clients needs, and then configuring the very flexible MillTech software to best fit our lumber client's unique requirements. Responsibilities also include project managing which includes defining and executing on delivery and implementation plans. Testing and troubleshooting final system setups. Provide training and end-user support during and after the implementation process. The right person may also eventually become involved in giving pre-sales product demonstrations.

For the right person the position of implementer is both challenging and satisfying as you will be instrumental in improving our client's businesses by assisting them in their implementation of the MillTech Inventory, Sales & Production System.

Experience in the wood products industry with lumber inventory systems is mandatory. The following knowledge or experience would be beneficial to have and would aid you as an implementer:

- Accounting or bookkeeping background.
- ERP systems project management or implementation experience.
- Some Technical knowledge including:
 - Knowledge of SQL and/or Microsoft SQL Reporting Services.
 - Ability to write queries.
 - Experience with in-the-mill data collection.

Send your resume to tneal@milltechims.com. Or call Terry Neal at 1 866 878 8809. Please include a cover letter. Website: MillTech www.milltechims.com
