

MillTech Inventory Management Solutions

MillTech Inventory Management Solutions is a Surrey BC based developer and implementer of lumber inventory/sales and production systems.

We are looking for a **VB.Net programmer** and a **Microsoft SQL Reporting Services (SSRS) report writer**.

The programming position required duties will include, programming business solutions in VB.NET, writing stored procedures, triggers, report writing, support. Experience in programming printers, handheld devices, networks is a plus. Experience in SQL and Microsoft SQL Reporting Services report writing is a requirement for this position.

The report writer position duties include design and build business reports in Microsoft SSRS based on requirements provided directly from end users. Must be able to work with, communicate and learn from the non-technical end users about their processes. Will support, trouble shoot and make changes to current SSRS reports. Must have experience with Microsoft SSRS or similar report writing/development tools. A strong technical background in SQL databases, stored procedures, queries is required.

Experience in the lumber industry is a plus for both positions.
