

PRODUCTION ENGINEER- BARWICK, ON

Reporting to the Production Manager, the **Production Engineer** will ensure that safety, quality, production and raw material usage in the blending, forming, pressing, and finishing areas is managed effectively and efficiently. The Production Engineer will also provide direct support and succession to the Production Manager.

Responsibilities:

- Create, maintain and work in a safe environment supporting the company objective of “0” incident rate. Report and participate in investigating safety incidents.
- Develop safe department procedures and safe work practices
- Maintain high housekeeping standards
- **Optimize safe, quality, cost-effective production for the Blending, Forming, Pressing, Finishing Area through the management of raw materials, equipment, and work procedures.**
- Evaluate and implement improvements for manufacturing systems. Develop innovative solutions.
- Collaboratively prepare weekly schedules with Area Leaders.
- Coordinate operations and maintenance activities on shutdown.
- Support operating and maintenance group to achieve high performance execution of the Blending/Forming/Pressing and Finishing areas.
- Conduct investigations into unplanned events- Root Cause Analysis
- To motivate, educate, train and support the ongoing knowledge and development of individual crew members.
- Other duties as assigned.

Qualifications:

The ideal candidate must be prepared to develop their knowledge in the operation and be prepared to advance into the Production Manager role. They should have 5 years of work experience in the forest products industry or manufacturing environment and have completed post-secondary education at minimum. Preference will be given to candidates possessing a BSc-Engineering or other Wood Science degree. Strong working knowledge of software applications such as Microsoft Excel, Outlook and Word are required.
