

## Forest Engineer or Forest Professional (full-time)

Onsite Engineering Ltd. is seeking a full-time P.Eng (Forest), EIT, RPF, or RFT to work out of our Campbell River office. The successful candidate will be involved in resource sector engineering and will possess a strong background working within a dynamic team of professionals.

Onsite is an innovative company with a growing team that takes pride in managing and coordinating the delivery of quality engineering services for governmental, private, and industrial clients throughout British Columbia, Yukon, and Nunavut. We offer a competitive salary and benefits package, flexible work hours and location, and the opportunity to be part of a reputable coastal resource sector consultancy.

### Role

- ✓ Preparing engineering drawings
- ✓ Coordinating project drawings and reports
- ✓ Preparing project proposals
- ✓ Site surveys and inspections
- ✓ Project management and contract administration

### Skills Required

Successful applicants will participate in the provision of engineering services from the proposal stage through to planning, design, construction and commissioning of projects such as:

- ✓ Topographic surveying, layout, and as-built surveys
- ✓ Road and Bridge design
- ✓ Construction reviews for a wide variety of civil and resource engineering projects
- ✓ The ability to work alone or as part of a multi-disciplinary team of engineers, geoscientists, forest professionals, administrative staff, and other technical staff

### Qualifications

- ✓ Registered with EGBC or ABCFP as a P.Eng, EIT, RPF, or RFT
- ✓ Minimum 5 years of experience in road and bridge engineering
- ✓ Proficient in the use of RoadEng and/or AutoCAD
- ✓ Proficient in topographic surveying
- ✓ Self-motivated with strong interpersonal and communication skills
