

POSITIONS: REGISTERED PROFESSIONAL FORESTER (RPF) AND/OR REGISTERED FOREST TECHNOLOGIST (RFT)**LOCATION: Fort St. John, BC**

ROY NORTHERN LAND AND ENVIRONMENTAL is currently hiring to fill a number of forestry positions on our forest development business side of operations. We are a surface land and environmental consulting firm with a special interest in forestry, oil and gas, mining, energy, and agricultural industries, as well as municipal authorities throughout Alberta, British Columbia and Canada's north. We employ a team of over 65 staff members located in our Fairview, Calgary, Fort St. John, Prince George, and Terrace offices, and offer interdisciplinary expertise to develop environmental solutions for our clients throughout western Canada. For over 30 years, we have directly assisted clients in regulatory application, development of resources and have proven consulting record of delivering results.

GENERAL QUALIFICATIONS

- Registered, eligible or a desire to register with the Association of BC Forest Professionals as RPF, RFT, FIT, TFT, ATC or SAS
- 2+ years of relevant forestry experience (additional environmental consulting experience a plus)
- Post-secondary Degree or Diploma in Forestry
- Proficient computer skills with Microsoft Office
- Current Safety Tickets (a plus); Valid Class 5 Driver's License; Canadian Citizen or Permanent Residency

REQUIRED COMPETENCIES

- Experience with timber cruising and timber reconnaissance
- Experience in cutting permit and appraisal submissions
- Familiar with BC Forestry Legislation, Regulations and Policy & Practices
- Well versed in applicable environmental regulations, guidelines and associated industry practices within BC
- Strong commitment to client satisfaction and a working knowledge of the forestry industries
- Ability to manage time and priorities effectively and ability to produce professional deliverables on time
- Strong commitment to health and safety
- Superior attention to detail, well organized, and ability to maintain accurate and up to date field information
- Strong communication and technical report writing skills
- Experience working in sometime difficult terrain in remote areas
- Experience using Quads, snowmobiles, side X side all terrain vehicles

RESPONSIBILITIES

- Participation in a team environment, working closely with Project Managers and co-workers to complete work programs
- Preparing and coordinating project documentation, subcontractors and equipment for field programs
- Participation in field data collection programs (i.e., timber, road centre line and boundary layout, watercourse, wetland, vegetation, soil, and wildlife assessments)
- Timber cruising/valuation GPSing, boundary and road layout
- Timber reconnaissance survey
- Reviewing, understanding and implementing plans consistent with BC Forestry Legislation, Regulations and Policy & Practices, guidelines, best management practices, higher level plans, etc.

COMPENSATION

- Full Time Position; Competitive Salary
- Group Life and Health Benefits; Wellness Program
- RRSP and Employer Contributions

Please email applications to humanresources@roynorthern.com. This posting will remain open until a suitable candidate has been selected. We thank all applicants for applying and advise that only those candidates selected for interviews will be contacted.
