

Silvacare Incorporated is a Geographic Information System (GIS) and digital mapping consulting firm located in Courtenay on Vancouver Island, British Columbia.

We specialize in full phase data management, GIS analysis, electronic submissions, and multi-phase operational mapping products. Our clients include numerous Forestry, First Nations, Government, Mining, Tourism, and Municipal organizations.

Silvacare Inc is currently seeking a dynamic individual for immediate placement to fill the role of:

## GIS Technician/ Analyst

The GIS Technician/ Analyst is responsible for:

- Complex GIS queries, geoprocessing, and other spatial and attribute analysis to support a variety of forest management objectives
- Prepare resultant data overlays for strategic planning and reporting
- Preparing Operational Maps and other deliverables

Ideally, the successful candidate will possess the following

- College technical diploma or a degree in GIS or mapping
- Experience working with ESRI Products, Arcview, Arc Catalogue, and Spatial Analyst
- Microsoft Office Products: Word, Excel, Access (or other database program)
- Experience working in the BC forestry sector
- Knowledge and working experience with LiDAR, ortho and 3D imagery
- Ability to work independently and be self-directed
- Results orientated with attention to detail and data accuracy to produce quality output in a deadline driven environment

Silvacare Inc is an equal opportunity employer with a strong commitment to teamwork, staff development, and operational health and safety. Extended benefits, flexible work schedules and pay commensurable with experience.

Please send a detailed resume to [silvacare@telus.net](mailto:silvacare@telus.net) or via our website at <https://www.silvacare.com/careers.html>

We thank all applicants for their interest; however only those selected for an interview will be contacted.
