

[Valard](#) Construction LP, is Canada's premier utility contractor, as well as head of the [Valard Group of Companies](#) AND part of the [Quanta](#) Group, the largest electrical power contractor in North America. Valard has full-service capabilities for transmission, distribution, substations, foundations, telecommunications and renewable energy.

Reporting to the Manager, ROW, the GIS Analyst will work closely with Manager, Planners to provide GIS support for Valard's ROW Operations.

Duties:

- Develop operational plans for new right of way development projects throughout Canada
- Detailed analysis and development of statistics for project costing estimates
- Produce quality maps displaying planned activities through the compilation of various geospatial data sets
- Perform on-going GIS spatial database maintenance, as well as analysis and interpretation
- Conversion and the translation of mapping data and GIS data into useable formats
- Provide ongoing documentation, improvements, maintenance and auditing of GIS/mapping processes
- Manage operational and landscape level data, geodatabases, data integrity and data security
- Compile and organize in-house GIS Database
- Determines schedule deadlines, prepares schedule, and organizes work sequences with the project team
- Meet timeline requirements and project budgets for GIS and mapping projects
- Quality Assurance on new or revised data and mapping products
- Generation and distribution of maps, GIS reports, status reports and identifying GIS issues requiring attention
- Complete checklists and ensure any maps are compiled and prepared according to procedure

Requirements

- Graduation from an accredited post-secondary GIS program with minimum 5 years' experience preferably working within the natural resources field.
- Right of Way planning or Forestry experience would be considered a definite asset.
- Must be proficient in current ESRI's and ArcGIS software suite
- Experience in Geodatabase, ArcSDE, Python and LiDar
- Experience with Resource Road design and/or Road Eng software
- A clear communicator with good interpersonal skills able to articulate concepts and solutions clearly to project team members
- Strong analytic and organizational skills that can perform under tight deadlines
