

Where ideas work

**Ministry of Forests, Lands, Natural Resource Operations and Rural Development
Kamloops or Penticton**

**Research Forest Landscape Ecologist
\$68,008.54 - \$85,592.73 annually**

This position is also posted as a Biologist 27 via [Requisition 81483](#).

The Ministry of Forests, Lands, Natural Resource Operations and Rural Development has a mandate to manage specified Crown land and resources in a manner that embraces the economic, environmental and social goals of government. These results are all essential to improving the global competitiveness of BC industry and our ability to attract private investment and to stimulate economic growth and job creation across the province.

In this role you will be a research scientist and scientific advisor in the field of forestry and natural resource management. There will be a focus on silviculture and silviculture systems that will have you conducting applied research to support science-based decision-making and providing expert professional advice relating to silviculture, silvicultural systems, ecology, climate change, and soils. Key initiatives of the position will support legal and regulatory updates (E.g., *Forest & Range Practices Act* updates - Forest Landscape Planning), Old Growth, Wildfire Recovery, Wildfire Risk reduction, and Dry Interior Douglas-fir management. You will also conduct forest and natural resource management research, and communicate results to operational, scientific, and technical users, as well as Indigenous and public groups.

A career with the Ministry of Forests, Lands, Natural Resource Operations and Rural Development offers an exceptional opportunity to undertake a variety of challenging and rewarding roles, while supporting a healthy work/life balance. Check out this [video](#) to learn more about biology careers at the Ministry of Forests, Lands, Natural Resource Operations and Rural Development.

Qualifications for this role include:

- Thesis-based M.Sc. or higher (Ph.D. preferred), specializing in a Natural Resource Management related science specialty such as Forest and Silviculture Science, Applied Ecology, Climatology, or equivalent education and experience.
- Registered, or immediately eligible for registration, as a Registered Professional Biologist (RPBio) in BC with the College of Applied Biology within six months of employment. Note: immediately eligible for registration is defined as being able to transfer a current membership from an applicable jurisdiction to the CAB within six months of employment.
- Demonstrated experience planning and implementing research projects.
- Experience producing technical reports and research publications.
