

Each year, Canfor hires numerous employees into temporary positions to work as Field Assistants across our various divisions. Right now, we are currently looking for Field Assistants in Prince George, Chetwynd, and Cranbrook BC for 4- 11-month work terms. Could one of these opportunities be the perfect fit for you? See positions listed below:

- [Field Assistant \(Field Operations\) – Prince George, BC \(4, 8, or 10-month contracts available\)](#)
- [Field Assistant \(Silviculture\) – Chetwynd, BC \(8 or 10 month contracts available\)](#)
- [Field Assistant \(Silviculture\) – Cranbrook, BC \(Two 11-month contracts available\)](#)

If you are an “unbeleafable” team player who excels at listening, speaking, and observing and you welcome the idea of getting a little dirt on your boots, keep on reading!

As a **Field Assistant** in **Prince George, BC** you will be responsible for site level plans and ecosystem data collection. You will be involved in operational cruising, timber stratification and preliminary feature identification using Lidar data and imagery. You will never be “board” as you road and cut block layouts, perform riparian assessments and prepare field information mapping streams. What “wood” we do without you?

In a **Silviculture** role at either our **Chetwynd, BC or Cranbrook, BC** locations, your daily responsibilities will include the supervision of planting, vegetation management, and site preparation. You will update key silviculture databases following completion of activities and be involved in the finalization of post-harvest prescriptions and regeneration surveys. Safety is no accident, and you will work to continue your spotless reputation as you ensure compliance with Canfor’s safety, environmental, and quality standards.

In these roles, you have current or past enrollment in a Forestry or Natural Resources Management program and/or forestry experience as well as a valid Class 5 Driver’s License.

If you are the **motivated, problem-solving** and **ambitious** type who likes to keep moving, stay challenged, and work with your hands, take a “leaf” of faith and click that “apply” button today!
