

Forestry Full Time Field Stream Technician

DWB Consulting Services Ltd is seeking a dedicated and knowledgeable **Stream/Fisheries Technician** to join our dynamic team and support environmental projects across British Columbia. The ideal candidate will bring experience in wildlife and aquatic habitat assessments, data collection, and fieldwork, contributing to impactful environmental outcomes. As a member of our forestry team, you'll be part of a collaborative environment that values Integrity, Community, and Service. We encourage applicants who thrive in a diverse and team-oriented setting.

This position is primarily a field position with travel and some office work. The primary office location is Prince George.

Compensation: Compensation is dependent on experience level with expected range of \$23 - \$27/hr plus (professional dues if applicable), benefits, vacation pay, RRSP program and more.

Key Responsibilities

Fieldwork and Data Collection:

- Conduct fisheries and aquatic habitat assessments, including species surveys, habitat evaluations, and monitoring.
- Stream assessments and classification to support responsible forest management decisions.
- Complete Riparian Management Area field marking based on the assessments.

Environmental Monitoring and Compliance:

- Monitor construction sites and industrial activities to ensure environmental compliance.
- Collect, analyze, and interpret data on wildlife populations, fish habitats, and ecosystem health.
- Collect field information to assist in developing and applying mitigation measures to minimize environmental impacts.

Reporting and Collaboration:

- Assist in the preparation of technical reports.
- Work closely with senior Foresters, Biologists and project managers to integrate wildlife and fisheries data into comprehensive forest site plans.
- Build positive relationships with clients, regulators, Indigenous communities, and other stakeholders.

Qualifications and Skills

Education:

- Diploma or degree in Fisheries, Environmental Science, Natural Resource Management or a related field.

Experience:

- Minimum of 1–3 years of field experience in wildlife and/or fisheries monitoring.
- Familiarity with fish and wildlife survey techniques.
- Familiar with Forest Planning and Practices in Riparian management areas.

Skills:

- Proficiency in data collection, analysis, and GIS/mapping tools.
- Strong communication and report-writing skills.
- Ability to work in challenging outdoor environments and remote locations.

Additional Skills and Assets:

- Knowledge of provincial and federal forestry and environmental regulations.
- Certification in electrofishing, Swiftwater rescue, or other relevant training is an asset.

Benefits:

- Health, dental, and vision benefits.
- Retirement savings plan with employer contribution.
- Vacation Pay.
- Opportunities for professional development and training.
- Team-building events and company-sponsored trips.

How to Apply:

To apply, please submit your cover letter and resume, detailing your qualifications and experience, to resumes@dwbconsulting.ca. Please include the job title and location in your subject line.

DWB Consulting Services Ltd. is committed to a culture of Integrity, Community, and Service, and we welcome diversity and inclusion in our workplace. We are looking for experienced individuals who are passionate and want to join a positive, collaborative team.
