

MAINTENANCE MANAGER

Rockshield Engineered Wood Products operates a plywood overlay mill at Cochrane, Ontario. The majority of panels are hardwood plywood to which Rockshield adheres a hardwood veneer such as oak, cherry, maple, birch etc. as an overlay to produce high quality ready-to-use panels. Visit www.rockshieldsdewp.com for the complete story on Rockshield and their superior products.

The Maintenance Manager is responsible for overseeing the maintenance, repair and upkeep of all plant equipment and facilities. This role is critical in ensuring that production runs smoothly, efficiently, and safely by minimizing downtime and maintaining high standards of equipment reliability. The Maintenance Manager will lead a team of skilled technicians, work closely with production teams and implement preventive maintenance programs. A detailed position description available upon request.

Candidates should have a degree in Mechanical or Industrial engineering or have a successful career history in maintenance management in a large industrial environment. Forest industry, especially experience with panelboard production, is particularly beneficial.

A highly competitive remuneration package is offered.

Visit www.cochraneontario.com to learn about Cochrane, Ontario, population 5,500. Cochrane is an hour drive from Timmins, population 45,000.
