

GAP ENVIRONMENTAL INC

GAP Environmental Inc. is a professional field services contracting company currently working across Alberta and Saskatchewan. Our core business is centered around Utility Vegetation Maintenance with a focus on the patrolling and consenting of required tree work around powerline corridors. Along with Utility work GAP Environmental Inc. also works across Oil and Gas, Forestry, and Railway sectors providing Project Management, Supervision, and Environmental consulting.

GAP Environmental Inc. was formed in 2006 and is based in Alberta. We are a small, locally owned and operated company that operates professionally, transparently, and with high accountability. We operate under the following vision/commitment statement:

We will be ***professional*** and will always work ***safe***, all while working to exceed ***quality*** expectations along with being ***productive*** to meet scheduling and business needs.

We are currently seeking to fill the following position.

Utility Forester, Utility Forest Technician

To complete vegetation assessments of powerline rights of ways. Includes patrolling, consenting and notifications with landowners. High communication, tree knowledge, mapping, GPS, and computer skills will be required. Field based job working on Utility corridors. Work schedule to be extremely flexible. Extensive travel will be required with work locations spread out across Alberta and Saskatchewan. Home base is flexible with central Alberta preferred. Benefits and compensation to match experience and skill, along with a profit-sharing program based on company and individual performance. Preferred candidates will have a Forestry or Environmentally based degree, diploma, or certification.

All applications are to include a resume and covering letter in PDF format attention to Glen Panych at glen@gapenvironmental.ca
