What You'll Do

Operational timber cruising with call grading in the interior of BC. In this role you are mentoring a cruising assistant and preparing data for cruise compilation. Timber assessment and valuation for Mule Deer Winter Range management. Identifying and maximizing timber harvest opportunities through timber reconnaissance and development and applying the guidelines and principles from the client Forest Stewardship Plan. Follow company Occupational Health and Safety Plan and client Environmental Management System. Cruising will be seasonally dependant and your responsibilities will extend to forestry resource development activities such as road and block layout. Training and mentoring will be included with the position.

What You'll Bring

- 1-2 years of timber cruising experience in the interior of British Columbia
- Strong knowledge of the BC Timber Cruising Manual
- ATC, ATE, RFT or RPF or working towards one of these designations is preferred
- Experience in timber recce, block and road layout is an asset
- Care about and strive for quality and correctness of the work completed
- Positive attitude and willingness to work hard within a team and work with limited supervision
- Highly organized with attention to detail, ability to provide mentorship to junior field technicians
- Experience in safe operation of trucks, ATVs and snowmobiles
- Work in a team-based environment and achieve safety and EMS goals
