

MELRY FORESTRY CONSULTING LTD.

MelRy Forestry Consulting Ltd. has an opening for a GIS Technician. The position can be remote to an extent but will require some initial onsite presence as well.

MelRy is based out of Nakusp BC. Main clients are Interfor and Nakusp & Area Community Forest

Job Summary:

Technician will be responsible for providing mapping products and spatial analysis reporting to support operations.

Essential Functions:

- The Mapping Technician will focus on developing mapping products,
- Organize, prioritize and manage workload,
- Ability to work independently with minimal supervision.
- Create, develop, and maintain spatial and attribute data bases used in Geographic Information System (GIS) applications.
- Help manage and maintain accurate digital data and information that will be used to reproduce maps.

Other Duties:

If local the job offers the flexibility to combine forestry field and office work. Duties, responsibilities, and activities may change at any time with or without notice.

Requirements:

Ideal candidate would have:

- Post-secondary degree or diploma in Geographic Information Systems
- Experience in forestry GIS work utilizing ESRI Desktop GIS software, QGIS, ArcGIS Pro, ArcMap, ArcGIS Online and GPS software .
- Familiarity with Lidar and LRM would be considered an asset.
- Preferably located in BC

Salary will be above average industry standards and based on experience level.

Please forward your application to christy.delorme@melryforestry.com or through the company website at melryforestry.com .
