

Resource Analyst

Silvacom™ provides consulting and software solutions to improve land management. We use design, innovation and creativity to help our clients solve real-world problems. We are currently seeking highly motivated, results-oriented individuals to add to our team.

The Role

The selected individual will be presented with exciting growth opportunities by playing a critical role in providing solutions to Canada's complex environmental challenges. You will focus on critical work assisting our clients from multiple resource sectors such as forestry, oil, gas, and utility, as well as government agencies, communities, and other stakeholders. Duties may include gathering business requirements of customers, documenting and analyzing information and data, assisting clients with regulatory applications, developing project plans, coordinating field activities, implementing, and monitoring work breakdown structures, monitoring status and progress against planned objectives and various other analytical tasks with an environmental and resource focus. This role will have both office and field work components.

The duties of the position will require you to primarily be in a technical role. Project types may include:

- Habitat restoration planning, implementation, and monitoring
- Wildfire mitigation planning and implementation
- Landscape management planning
- Data analytics

Required Skills and Experience:

- Initiative and creativity when approaching challenges
- A determined focus on meeting the needs of internal and external customers
- High attention to detail and commitment to quality
- Strong interpersonal, communication, and organizational skills
- Excellent oral and written communication skills
- Function as a team player with a desire to be part of a world-class team solving real-world problems
- Self-motivated and able to work independently without constant supervision
- Desire to take an active interest in the company
- Desire to be challenged and pushed professionally
- Ability to work under pressure, prioritize tasks, and deliver within tight deadlines
- Demonstrated experience and ability to work in the field in remote locations
- Desire to learn and become proficient with various software packages including SPSS, R, and MS Office
- Project management experience would be considered an asset

Academic Qualifications:

- An undergraduate degree in forestry, agriculture, environmental science, ecology, environmental planning, or related field
- A graduate degree in forestry, agriculture, environmental science, ecology, environmental planning or related would be considered an asset, but not mandatory
- Eligible to hold a professional designation such as EP, RPF, P.Bio, or equivalent

Location:

Work location: Edmonton, Alberta

Head Office: Edmonton, Alberta

Compensation:

We offer competitive salaries commensurate with abilities, a medical/vision/dental package, Flexible Spending Account (FSA) and a company-sponsored RRSP plan, remote working options, as well as no end to challenging opportunities!

APPLICANTS: Please visit www.silvacom.com/careers to submit your resume with cover letter in MS Word or PDF file format. Also, please indicate where you saw our ad listing. If applying, please view our [privacy policy](#). We thank all applicants for their interest; however only those selected for interview will be contacted.
