

## Forest Operations Supervisor, Western Nova Scotia

### About WestFor Management Inc.

WestFor Management is comprised of multiple Nova Scotia companies who are stakeholders in the Forestry industry. WestFor manages forestry operations on Crown Land in Western Nova Scotia.

### Position Available

Currently, we are seeking a “**Forest Operations Supervisor**” for immediate employment. This is a full time position with flexible hours and an attractive wage and benefits package for the right candidate.

The purpose of this role is to effectively supervise and facilitate the day to day operations of various forest activities including, but not limited to, harvesting, road construction and silviculture. The successful candidate is a positive individual who brings energy and initiative to their role. They are organized and willing to change with the needs of the business.

WestFor is a growing company and there is opportunity for the individual in this role to increase their responsibilities, if successful.

### Qualifications:

- Post-secondary education in a recognized Forestry program.
- Must possess technical forestry related skills, and have a solid understanding of forestry policy, guidelines and regulations.
- Strong organizational, problem solving, communication and time management skills.
- Supervisory experience is considered an asset.
- Experience in forest road construction and maintenance is considered an asset.
- Keen desire to work in the field of Forest Management, and capable to work independently outdoors in all weather conditions, in remote areas.
- Valid Class 5 Driver’s License required.

### Key Responsibilities:

- Meeting quality, safety, environmental standards and government regulations.
- Performance management, scheduling and supervising contractors performing forest operations, primarily harvesting, hauling and road construction.
- Identifying opportunities for operations improvement.
