

## Superintendent Fibre Supply

### Job description

Develop short and longer-term plans for the delivery of quality, cost appropriate roundwood fibre, to the White River Sawmill. Enact as part of a small agile team those plans while reacting to a dynamic setting.

Provide oversight where warranted for ongoing forest activities throughout the supply area of the White River Forest Products Sawmill.

- Adopt White River FP values, principles, as your own.
- Follow all laws and regulations as applicable.
- Report to General Manager – Forest Management

### Responsibilities

- Promote and contribute to a safe workplace and work environment.
  - Provide direction to, contractors, and suppliers while maintaining communication within the team.
  - Develop and maintain rapport with outside agencies, other forest users, and management.
  - Participate in regular planning pertaining to budget development, and cost control.
  - Drive the activities of the woodlands operation to proactively maintain delivery targets, quality of wood fibre and wood supply to the White River Sawmill.
  - Prepare harvest schedules, production statements and forecasts.
  - Report performance against cost estimates, harvest forecasts etc.
  - Understand sources of variance from planned operations and explain deviations.
  - Adapt and provide insight/ideas for improvements in a changing workplace.
  - Coach and mentor employees to facilitate individual growth and performance.
- 
- Efficiently, through organized planning, ensure all weather roads and bridges are constructed as specified in the Woodlands Annual Plan.
  - Ensure that the gravel road system is maintained through inspection and coordination of grading, snow removal, bridge repair and other activities.
  - Lead annual roads program submissions and reimbursements.
  - Comply with corporate policies, procedures, programs, and legislated regulations with respect to health, safety, and the environment.

### Requirements

- Education: University Degree in Forestry or equivalent relevant work experience.
- Proficiency with digital reporting systems, analysis tools, reporting and modeling software.
- Experience: Must have 2 plus years in a similar role.
